23 Million Pound Quota Set on King Crab Takes

ANCHORAGE — The Alaska Board of Fish and Game Friday set a 23 million pound quota on king crab catches in the Bering Sea shellfish area for June 1, 1973 - March 31, 1974.

The quota had been proposed by fish and game board staff. Some processors objected, charging lack of restriction of foreign fisheries.

The fish and game board, led by chairman Oscar Dyson of Kodiak, also set new quotas on king crab catches for the southern and Shelikof districts in the Kodiak area. The quota in the Shelikof District went down from 1.5 million to one million pounds of king crab; but in the Southern District it went up from 10 million to 13 million.

Board members voted against creation of a Bering Sea registration area for fishermen, but ruled that king crab fishermen in the Kodiak area cannot fish anywhere else, except the Western Aleutians.

The week long meeting covered a number of proposed changes in commercial and subsistence king and tanner crab fishing regulations.
