NOTICE OF PUBLIC TESTIMONY

Testimony Heard March 24, 1993: 6:00-9:00 p.m.
Legislative Information and Teleconference
Courthouse, Room 305, Barrow, AK

The Governor's Committee on Employment of People with Disabilities will be taking public testimony regarding accessibility to buildings housing State of Alaska programs and services. The committee wants to know what architectural barriers you would like to see removed first and how this will provide greater access to state programs. This information will be used to compile a prioritization list to present to the legislature in support of requested Capital Project funds designated to pay for architectural barrier removal. If you are unable to appear in person at this site, you may direct your comments to the committee at the following address:

P.O. Box 107018, Anchorage, AK 99510-7018

JANE SUTHERLAND NIEBERGALL

"I couldn't support my cocaine habit and go to law school... so I dropped out of law school."

"My highs would last only twenty minutes... yet they meant more to me than anything. Cocaine ruled my life. I lost everything. Thankfully, my parents loved me enough to intervene."

I wanted more out of life so I agreed to treatment. That was six years ago... and guess who's about to graduate with his degree! You can help someone who doesn't want help. Please pick up the phone and call. We'll explain why intervention works and how it may save the life of someone you love (like it did for me)... Help us help you."

OPPORTUNITY FOR PUBLIC HEARING NOTICE KASIGLUK AIRPORT IMPROVEMENTS PROJECT NUMBER 59654

The Alaska Department of Transportation and Public Facilities (ADOT&PF) is soliciting comments on a proposal to reconstruct the Kasigluk Airport, located 26 miles west of Bethel. The present runway consists of a 2,500-foot by 100-foot runway safety area with a present runway landing surface measuring 2,440 feet by 60 feet. A 175-foot by 125-foot aircraft parking apron with no aircraft tie-downs abuts the runway. The airport is without a runway lighting system and existing snow removal equipment is old and requires replacement.

The purpose of the proposed project is to bring the Kasigluk Airport into conformance with the State of Alaska Aviation System Plan (System Plan). According to the guidelines recommended by the System Plan, community class airports such as Kasigluk, require a runway safety area measuring 3,480 by 120 feet when the design aircraft is a single engine or light-twin aircraft such as a Cessna 207, Piper Cherokee Sbc, Piper Navajo, or Cessna 402. The proposed project would provide the community of Kasigluk with such a runway by reconstructing and lengthening the present one. The existing apron/taxiway would also be reconstructed to conform with the System Plan and a medium intensity runway lighting system would be provided. The purchase of snow removal equipment is also proposed.

The proposed project would involve the excavation and fill of approximately 142,000 cubic yards of sand/silt material within an old lake bed near the Johnson River.

The ADOT&PF is considering the economic, social, and environmental effects of the proposed project and its consistency with the goals and objectives of such urban planning as has been carried out by the community of Kasigluk. Interested individuals who may have concerns regarding the proposed project may request a public hearing. Please respond in writing to the address below by April 9, 1993. A draft Environmental Assessment is available upon request at the address below. If you wish to express concerns regarding the environmental effects of the proposed project, please contact Dan Golden, Environmental Analyst at 266-1781. If you have any questions in regards to the engineering aspects of the proposed project, please contact John Wahl, P.E., Project Manager at 266-1580.
