

# DDD Comes to Fairbanks

## May 21

**Direct Distance  
Dialing means fast  
efficient service for our  
customers.**

### **HOW TO MAKE STATION TO STATION CALLS**

Now it is possible for you to direct dial your own station-to-station long distance calls throughout Alaska, the Lower 48, and most other countries. The following steps will help you in completing your calls faster and more efficiently:

- Station-to-Station in Alaska -- Simply dial the access code number (101), then the desired number. (Example: To call Anchorage, dial 101 + 279-4567.) The telephone operator will come on the line and ask the number you are calling from for billing purposes.
- Station-to-Station outside Alaska -- Simply dial the access code number (101), then the distant area code and telephone number. (Example: To call Seattle, Washington, dial 101 + 206-623-3456.) Remember, the operator will ask the number from which you are calling for billing purposes only.
