The Good Life. Does it still include the water?

What's happened to our water supplies is a crime. And don't think you're safe just because you don't live in a big city. Because you're not. Toxic organic compounds, pesticides, bacteria not only threaten your Good Life... they threaten your life.

A Pure Water home distillation system can guarantee you a supply of water that is virtually free of all man-made and natural pollutants... conveniently and economically.

Protect your Good Life, with a Pure Water home distillation system. Because Pure Water is precious as life.

Please send me complete information on distillers.
