276-2653, ext. 248

Wherever central heating doesn't go, a Kero-Sun® Portable Heater does.

A Kero-Sun® Portable Heater can warm up those areas that central heating doesn't reach. It can take the damp chill off a boat. Or keep a remote cabin as warm and cozy as your living room back home. And if you use a garage as a workshop, you can keep yourself warm and comfortable with one of our heaters. In fact, there are literally hundreds of uses, because these units are all portable. No chimney or electricity is needed. And aside from their versatility, Kero-Sun Portable Heaters are terrific money-savers. With one of our heaters around, you can stay warm for a few cents an hour. Also works as an economical supplement to your central heating system. Just turn down your thermostat and put the heater where you need it.

99.9% fuel-efficiency means odorless, smokeless operation. Battery-powered ignition system and automatic shut-off device for extra safety. 3 models to choose from. See a demonstration today.

The good news in home heating.
