The Marathon Oil Company's "Steelhead" oil and gas platform in Cook Inlet is being built by Brown and Root Construction of Houston, Texas.

Brown and Root refused to sign contracts with any Local Alaskan union and will have to hire the majority of their employees from Texas and Louisiana.

All of the existing platforms in the Inlet were built by the following Alaska unions.

Ironworkers Local 751
Divers & Piledrivers Local 2520
I.B.E.W. Local 1547
Operating Engineers Local 302
Pipefitters Local 367
Laborers Local 341

These Alaskans are still here! They are your neighbors in Kenai, Soldotna, Anchorage, Palmer, Wasilla etc.

This is a 100 Million dollar project. The payroll going to outside workers, if kept in Alaska, would pay Alaskans home mortgages, gas bills, food, clothes, and help keep our Local merchants solvent.

Enstar, the company that sells you natural gas, will be the purchaser of the gas produced by "Steelhead" platform.

Paid for by AK Iron workers Local 751
