

THIS WORLD IS BROUGHT TO YOU BY ALASCOM.

Since 1971, you have counted on Alascom to keep you in touch with a changing world. And we've always delivered. From pioneering live television broadcasts, to providing affordable long-distance calls for all Alaskans, we have revolutionized telecommunications on the last frontier.

Now, we're getting ready to put our second satellite into orbit. And our new digital fiber-optic

cable will assure that the latest technology is harnessed for the benefit of all Alascom customers.

On top of this, we're still lowering rates around the state, around the nation, and around the world.

After more than two decades of service to Alaska, we're still on top of the world.
