

JAN AND GLENN FREDERICKS, General Manager and President of Kuskokwim Corporation were recently recognized as having made significant contributions to forest management and conservation. During brief ceremonies at the Alaska Federation of Natives convention, John Sandor, Regional Forester, Forest Service, made the presentation to Mr. & Mrs. Fredericks.

Sandor mentioned Kuskokwim Corporation's work in the formation of resource inventories and a land use plan with subsequent market investigations for their resources. He continued by saying, "particularly noteworthy has been your interest in obtaining adequate resources information prior to making major land management decisions and your strong efforts to inform and involve the shareholders. Your efforts to inform shareholders in the Village has given them a definite voice in decisions."

The Forest Service is celebrating its 75th Anniversary and is choosing to observe the event by recognizing people who have contributed to forestry.
