

# "People Need Jobs NOW!"

"I want this economy to turn around as much as you do. And I'll take a one-third cut in pay as Governor until statewide unemployment drops back down under 10%.

"We'll have jobs if people can do business in Alaska. My administration will make it easier to do business here. Small businesses as well as big businesses, in the communities where we want to live. And you'll see results in my first 100 days!"

*Arliss Sturgulewski*

## SOLUTIONS FOR TODAY...

- ★ Cut out the red tape. Eliminate unreasonable regulations. Streamline permitting. *Make it easier to do business here.*
- ★ Invest in capital projects that help our industries and will be matched by federal funds.
- ★ Provide incentives for companies to turn our raw resources into finished products, *before* sending them Outside.
- ★ Invite companies with good ideas to do business in Alaska.
- ★ Promote Alaska's industries worldwide, expanding *all* our markets - fisheries, timber, minerals, tourism.
- ★ Keep the Permanent Fund Dividend coming to Alaskans.

## ...AND FOR TOMORROW...

- ★ Open the Arctic Slope Coastal Plain to oil and gas development.
- ★ Fight to export North Slope oil to foreign nations.
- ★ Keep the oil companies in Alaska for new exploration and development, because oil prices won't stay down forever.

# ARLISS STURGULEWSKI
