# **Energy Ant with Energy Saving Ideas...**

Ideas that can save you money. Ideas that we all can practice right at home. Turn down your water heater. This is the second largest consumer of energy in the home. Most water heaters are set at 140. 120 is adequate for most families.

Be sure your dishwasher is full and you do full loads of laundry. Defrost your freezer and refrigerator regularly. It saves energy. It saves money and these are ideas we can practice every day in every Alaskan home.

**DIVISION OF ENERGY & POWER DEVELOPMENT**
