

A poet's views on nuclear power, future of Athabaskan people

The enclosed pieces represent what's deeply on my mind in these days. I don't know whether you are familiar with this petition or not, but surely you must be . . . anyway, this is my form of petition.

I would like to have it

printed, so that my Athabaskan people can understand that some of us express our disgust and pain in the lower states as well. These causes are of a scope that envelops everything.

When I think that through

years of pain and humiliation, assimilating into the mainstream only to find the world has become so soiled, so pathetic in its dissolution, I am fired with anger.

And to realize that it is

what we leave to the children . . . Then to understand that if nothing is done, there will be no world to leave.
