### Public Notice of Availability

Alaska Army National Guard  
Draft Environmental Assessment  
Construction of a Federal Scout Armory at  
Marshall, Alaska

The Alaska Army National Guard, announces the availability of a draft Environmental Assessment (EA) evaluating a proposal to construct a new armory in Marshall, Alaska. The preferred alternative is to construct a 1,500 square foot metal building on a 10,000 square foot gravel pad on city land which has been leased to the Government. The No Action alternative would mean the proposed armory would not be built. Anticipated environmental impacts are expected to be minor. The armory is supported by the City of Marshall, and would provide long-term positive socio-economic benefits to the community. A Corps of Engineer's Section 404 permit has been obtained. Comment deadline is May 31, 1995.

For copies of the EA, or for additional information, please contact:  
George Cannelos, The Cannelos Group, 3120 West 79th Avenue,  
Anchorage, Alaska 99502, (907) 243-0506, or Helen Lons, Environmental  
Specialist, Alaska Army National Guard, Environmental Section, P.O. Box  
5800, Fort Richardson, Alaska 99505, (907) 428-6766.
