REQUEST FOR PROPOSAL

The City of St. Mary's is seeking professional engineering and consulting services for the purpose of evaluating the existing water and sewer service system of St. Mary's and developing plans for the expansion of the system to serve developing areas of the community. The existing water and sewer system consists of an infiltration gallery intake, gravity water storage tank, circulating pitotifice water system, and gravity sewer system

with lift station and sewage lagoon. Among the tasks to be accomplished are the following:

1. Evaluate the capacity and operational characteristics of the present water and sewer system and develop recommendations and cost estimates for necessary repairs and/or improvements.
2. Determine whether potential health hazards exist due to the location of the water supply intake and community growth patterns. Develop alternative recommendations, preliminary plans, and cost estimates to alleviate any potential health hazards that may exist.
3. Based on population growth trends and proposed development plans of the community, develop
