

FUR SEAL HARVEST TOTALS 51,000 SKINS

The Interior Department reported recently that the 1965 harvest of Alaska fur seals in the Pribilof Islands totaled 51,020 skins.

Of these, 41,216 were males, 6,352 from immature females, and 3,452 from mature females.

In addition about 1,500 skins were taken for experimental purposes.
