

# Lenharr finishes NASA workshop

Urtha S. Lenharr, a teacher from Kotzebue, recently completed a two-week NASA Educational Workshop for Elementary School Teachers at John F. Kennedy Space Center.

Lenharr was among 22 specially selected master educators attending the workshop, held July 8-20.

Lenharr was selected for the program by a committee made up from members of the co-sponsoring organizations, which are NASA, the National Science Teachers Association and the National Council of Teachers of Mathematics.

During their tour, participants got a close look at the specialized laboratories and operational areas where space technology is developed. Some of these areas included the materials testing, chemistry and biomedical research labs.
