

Modernization is wonderful, especially those 3-wheelers

by Grace Siwooko

for the Tundra Times

Gambell sure is going along in modernizing just fine. We have more nice things like library and school — I can see that this year 1987.

People that have been camping out at their summer camps have come back as the schools are starting, to put their children to school.

And boy, Honda is one new and modern thing I see! Those Hondas are very much in use here at Gambell, now, to go about as the place is spread out and got so spreading. Those Hondas are three-wheelers, very useful on this place with gravel. This year 1987, more and more Hondas are in use.

Gravel is very nice to have on the ground where you live, but it can be tiring to walk on all the time, so Hondas are very useful for here.
