

Hondas are useful—

News from Gambell

By GRACE SLWOOKO

Hondas are very useful and good around here nowadays. Lots of people use them to go about, since more modern ways are in use now. When the Munz planes come, there are many going to the airport with them.

Sometimes big planes come with freight for the stores here now.

People travel also. Everyday Munz planes come when it is clear weather; they make three trips a day. I'm sure, our forefathers would have taken this pilot training and would use this wonderful way of traveling, but no one has become a pilot yet, too bad. Not many of us are working good into this wonderful way of book and writing education.

This later part of spring, Dennis James got two summer whales, which supply many with dried meat and good oil. Dennis s a very active hunting man, my sister's eldest son.

Some men are very good at carving ivory, they even get their 6 wheels, chaperaels this way, by carving. So we like to go ivory digging in the old villages here and there on this island in summer time.

Some found idols of value once in awhile. Those carved idols or images were their dreams and vision. They carved sometimes for healing powers as there were death and sickness in places . Those days, a lot of white man has brought many and wonderful remedies, many thanks for the new comer, white man.
