

THINK ABOUT TOMORROW

**Department of
Energy
SMALL WIND ENERGY
SYSTEMS
FIELD EVALUATION
PROGRAM**

The Alaska Division of Energy & Power Development is participating in a small wind energy system evaluation program conducted by Rockwell International under a contract from the U.S. Department of Energy. The program goal is to demonstrate and evaluate connecting small wind power systems to utilities.

One and possibly two small wind generators will be installed in Alaska this fall. The Division of Energy is inviting interested Alaskans who wish to install and tie the generator into the utility grid to apply for this program. Specific site selection procedures will be followed and certain user criteria will be considered.

The program will be open for applications until August 6. If you are interested in applying or wish further information contact:
