

Correction

The St. George Tanaq Newsletter printed October 12, 1983 contained a statement to the effect that "the Highly Corporation of Taiwan was recently accused of poaching 6,000 metric tons of salmon bound for Alaskan waters."

This information was obtained from an article which appeared in a September 29, 1983 issue of the Anchorage Times.

This article has subsequently been retracted.

The accusation was completely false and we regret this article was included in our coverage.
