

UA Gets Grant For Microbial Growth Kinetics

COLLEGE—The University of Alaska has been awarded an \$88,200 grant by the National Science Foundation for support of research entitled "Microbial Growth Kinetics in Natural Waters."

The research is under the direction of Dr. D.K. Button of the Institute of Marine Science. Dr. Donald Hood is director of the Institute.

Button, an associate professor of marine science, is presently on a sabattical leave doing bacteriological research at the University of Colorado.
