

Provides Grant—

AFN, Inc. Aids ANICA

The AFN, Inc. Technical Assistance Division recently assisted ANICA, Inc. Business Management School by providing a grant for program development. The grant enabled the school to purchase equipment for their training headquarters in Anchorage and also purchase equipment and supplies for the traveling coordinator instructors.

Presently the ANICA, Inc. Business Management School is graduating a class of eight at the Seward Skill Center in refrigeration and furnace repair.

In July they are scheduling a course in conjunction with Standard Oil Company on bulk

fuel storage; in October a trade fair; and in November a small business retail seminar.
