FORMER UMIAT AIR FORCE STATION RESTORATION ADVISORY BOARD

What is a Restoration Advisory Board (RAB)? A RAB is a group of community and government representatives which provide the United States Engineer District, Alaska (USAED Alaska) decision makers with advice about environmental cleanup activities at the former and active military facilities. The RAB is the point of information exchange between USAED Alaska and the community. The RAB is intended to bring together members who reflect the diverse interests within the community and to allow for a two-way flow of information, concerns, priorities, and needs between the affected community and USAED Alaska.

Will A Restoration Advisory Board (RAB) be Established for the Former Umiat Air Force Station? To answer this question, the USAED Alaska needs your help! USAED Alaska is determining whether enough community interest exists to establish a RAB for the former Umiat Air Force Station. Please complete and return the coupon below if you are interested in the formation of a former Umiat Air Force Station RAB.

Name: _____

Organization: _____

Address: _____

Telephone: _____

☐ Yes, I would like to see the formation of a former Umiat Air Force Station RAB.

☐ Please add my name to the mailing list.

If there is enough interest in establishing a Former Umiat Air Force Station RAB, additional information about RABs, including a membership application, will be mailed to interested parties.

Please mail completed coupon to:

James Baker, Engineering Manager
United States Army Engineer District, Alaska
P.O. Box 898
Anchorage, Alaska 99506-0898
