

# Heavy Advance Orders for 1970 Milepost

If advance orders for Alaska's best known guidebook for visitors are an indicator, 1970 will be a banner year for the state's tourist industry.

Requests for the 1970 edition of the Milepost published by Alaska Northwest Publishing Company are 60 per cent above this time last year despite an increase in price, according to Robert A. Henning, editor and publisher of the twenty-second edition of the comprehensive guidebook.

Now on sale at newsstands, the 370-page Milepost, which has been described as a combination northern geography and encyclopedia, covers 6,785 miles of highways in Alaska, the Yukon, British Columbia and Alberta, as well as the state's marine highway system.

In addition to providing detailed maps and information about 95 cities and towns in Alaska and 88 in Western Canada, the new Milepost includes a 20-page fishing guide.
