

\$500,000 for operations conducted on more than one lease may be filed. These bonding provisions do not affect the Commissioner's authority to require additional unusual risk bonds as may be necessary. In addition, the Alaska Oil and Gas Conservation Commission (AOGCC) requires a bond of \$100,000 for a single well or a \$200,000 bond to cover wells statewide before drilling operations will be permitted by AOGCC. The state reserves the right to delete or contract proposed tracts at any time up to and including the day of the sale. Thirteen tracts totaling approximately 56,862 acres will be offered. Tracts C-36-001 through C-36-008 and C-36-013 were included in the Joint State/Federal Beaufort Sea Sale held in December, 1979 and as a result are delineated by the U.S. Department of Interior U.T.M. Survey System. Tracts C-36-009 through C-36-012 in the Flaxman Island-Canning River area are shown by the State of Alaska Survey Protraction System on a separate tract map. Both of these tract maps are available at DMEM. The proposed sale area is within the North Slope Borough. Communities in the vicinity of the proposed sale include Kaktovik, Nuiqsut, Barrow, and Prudhoe Bay/Deadhorse. In January, about 6,200 acres were added to the proposed sale. This acreage includes tract C-36-013 and portions of tract C-36-009 and C-36-012. The added acreage in tract C-36-012 was previously subject to a valid state oil and gas lease and has been added to Sale 36 under AS 38.05.180(d)(1). Tract C-36-013 and sections 13, 14, and portions of sections 10, 11, 12, 15, and 22 of tract C-36-009 are contiguous to submerged land already under state lease and have been added to the sale under AS 38.05.180(d)(2). On March 4, 1982 the Department of Natural Resources held a hearing as required by the statute. The Commissioner has made a written finding that the leasing of this acreage will result in a substantial probability of early evaluation and development. AS 38.05.035(a)(14) and the departmental delegation of authority give the Director, Division of Minerals and Energy Management, the authority to impose conditions or limitations, in addition to those imposed by law, to ensure that a disposal is in the state's best interest. To meet this requirement, the Director has developed environmental and social terms and conditions for tracts leased in Sale 36. Lease stipulations will be enforced throughout the term of the lease. Measures will also be imposed through approval of plans of operations and other permits as needed to mitigate undesirable social and environmental effects of lease related activities. The stipulations and terms describe standards that must be met by the operators with regard to water quality and appropriation, gravel extraction, oil spill prevention and cleanup, construction of roads, pipelines and other lease related structures and facilities, public access, disposal of waste, drilling muds and cuttings and produced waters, timing and routing of exploration and development activities, rehabilitation of abandoned sites, and additional permits and approvals. These stipulations and terms are necessary to protect the unique biological, archaeological, and social aspects of the sale area. In support of the lease sale, the Director of the Division of Minerals and Energy Management has prepared a final written finding under AS 38.05.035(a)(14) which sets forth the facts and applicable law upon which she has determined that the proposed action will best serve the interests of the state. The Director's written finding and decision is available to the public upon request at the Division of Minerals and Energy Management, 555 Cordova Street in Anchorage or by writing DMEM at Pouch 7-005, Anchorage, Alaska 99510. Additional information on the proposed sale is available to prospective bidders and members of the public at DMEM.

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the lands hereinabove granted; and
2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractor, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Alaska Native Claims Appeal Board, provided, however, pursuant to Public Law 96-487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.
