## The beautiful way to keep warm.

The beauty of Lindal Cedar Homes goes beyond their distinctive appearance. Lindal Homes are also designed to save energy. For instance, the unique cavity-wall construction in a Lindal Home acts as a thermal barrier against extreme outside temperatures.

To reduce your energy bills even more, Lindal has other optional features like Polar Cap Roofs, Polar Walls and Polar Floors — all with sufficient R-values to withstand the coldest and hottest climates.

In every Lindal Home, thermal windows are standard, of course.

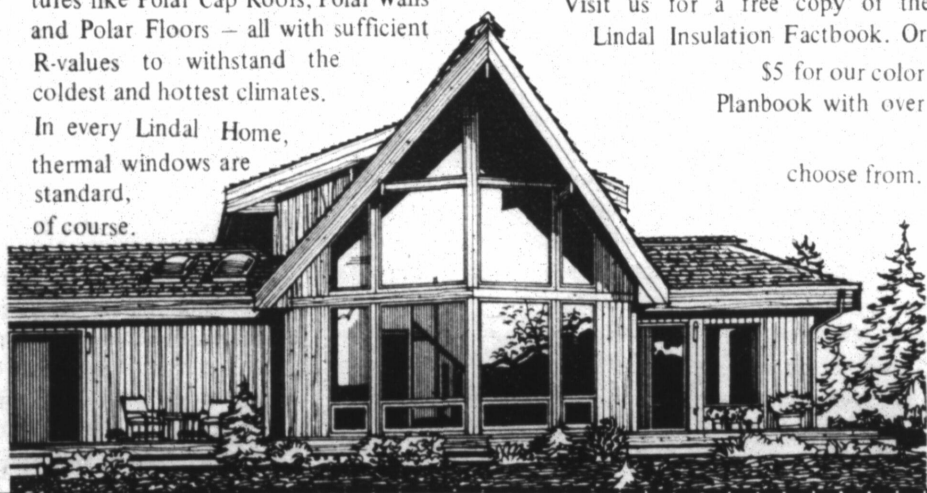

Every Lindal Home is designed to reflect your personality and lifestyle, with unique features like cathedral ceilings and open post and beam interiors that relieve "cabin fever" and give you lots of room to breathe.

Lindal Cedar Homes — more at home in Alaska than any other home you can buy.
