**One drop a second,  
700 gallons a year.**

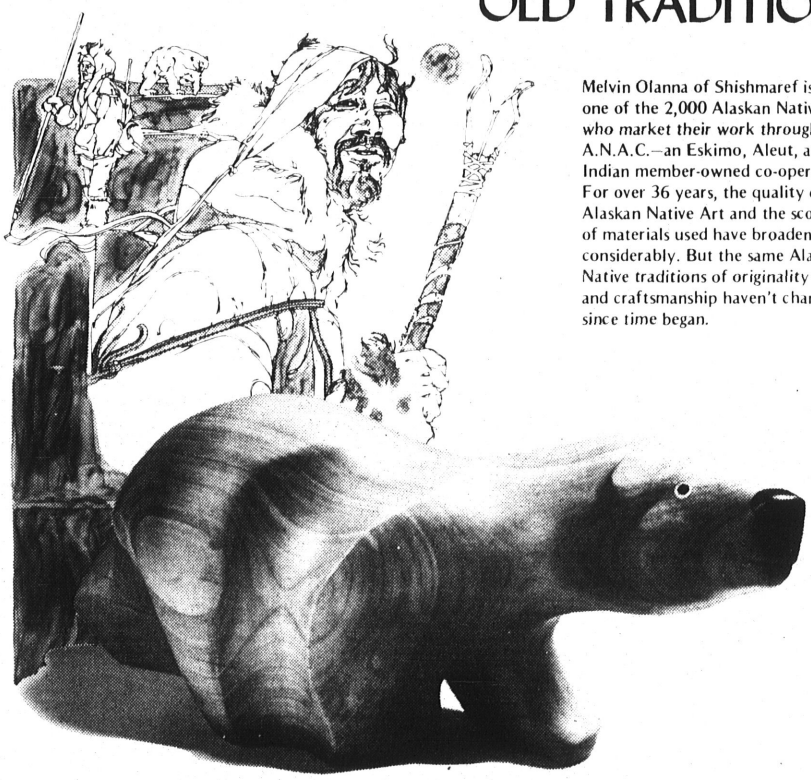

Never let a faucet drip. One drop a second  
can waste 700 gallons a year. If it's hot  
water, you're wasting fuel energy as  
well as money.

Today, 77% of our energy comes  
from oil and natural gas. Domestic  
supplies of both are falling far behind  
demand. America can't afford to  
waste energy—and every American  
can help save it. Write today for a  
free copy of "A Consumer's Guide to  
Efficient Energy Use in the Home."  
It's packed with ideas that can save the  
nation's energy and your money.

**MODERN ALASKAN  
ART IN THE  
OLD TRADITION.**

Melvin Olanna of Shishmaref is  
one of the 2,000 Alaskan Natives  
who market their work through  
A.N.A.C.—an Eskimo, Aleut, and  
Indian member-owned co-operative.  
For over 36 years, the quality of  
Alaskan Native Art and the scope  
of materials used have broadened  
considerably. But the same Alaskan  
Native traditions of originality  
and craftsmanship haven't changed  
since time began.
