In support of Lease Sale 80, the director of DO&G has prepared a written final finding and decision under AS 38.05.035(e) and (g), which sets forth the facts, policies, and applicable laws upon which he has based his determination that this sale will best serve the interests of the state. In addition, a conclusive coastal zone consistency determination has been made that this sale is consistent with the Alaska Coastal Management Program (ACMP).

AS 38.05.035(e) and the departmental delegation of authority give the director, DO&G, the authority to impose conditions or limitations, in addition to those imposed by law, to ensure that the disposal best serves the interests of the state. To meet this requirement, the director has adopted environmental and social terms and conditions, which may include limits on surface entry, for tracts leased in Sale 80. These stipulations and mitigating measures are part of the lease and will be enforced throughout the duration of the lease. These lease terms will be imposed through approval of plans of operations, exploration and development and other permits to mitigate potential adverse social and environmental effects of leaserelated activities.

This Best Interest Finding is a final administrative decision of the department. Aperson who is aggrieved by this finding may request the commissioner to reconsider the decision under AS 35.05.035(i) and (j). To be eligible an appellant must have meaningfully participated in the process to develop the finding by either submitting written comments during the prescribed comment periods, or by presenting oral testimony at a public hearing regarding the proposed sale. If the commissioner fails to act on the request for reconsideration by October 5, 1995, the request is considered denied.

A denial of a request for reconsideration is the final administrative decision for purposes of appeal to Superior Court. A person may appeal the Final Best Interest Finding to Superior Court only if the person was eligible to request, and did request, an administrative reconsideration of the finding by the commissioner. An appellant must initiate an appeal to the Superior Court within 30 days from the date of denial of that reconsideration or from date of distribution of the denial decision, in accordance with the rules of court and to the extent permitted by applicable law.

NOTICE OF UTILITY TARIFF FILINGS AND AMENDMENTS TO THOSE FILINGS

On August 23, 1995, the ALASKA PUBLIC UTILITIES COMMISSION gave notice that GCI COMMUNICATION CORP. (GCI), an interexchange telecommunications utility, had filed two tariff revisions (TA50-419 and TA51-419) to add three new offerings. On August 28, 1995, GCI amended both filings. This notice describes the filings as amended.

In TA50-419, GCI proposes to add Free Month Business Promotion. GCI describes this offering as shown below.

For business customers who switch their primary interexchange carrier (PIC) from another carrier to 'GCI, between and including September 20, 1995, and October 20, 1995, GCI will provide the following promotional offering: A credit will be applied to the customer's first month charges equal to their combined interstate and intrastate Direct Dial, GCI Calling Card and 800 Service charges for the access lines switched to GCI, up to a maximum of \$1,000. Additionally, if the customer switches their PIC for any access lines on the GCI discounted account from GCI to another carrier before the end of their first six months of service, GCI will debit the amount of the initial credit to the customer's account.

In TA51-419, GCI proposes to add two new services, Alaska Business Savings and Alaska Business Advantage. A customer may select one of these new services in lieu of GCI's regular dial station basic rates and calling card basic rates. Both the plans include only dial station and calling card calls. GCI notes that generally customers may subscribe to only one calling plan. A comparison of a few of the rates from the proposed two new schedules with rates from the current dial station basic rate schedule and the calling card basic rate schedule is shown below. The charts do not contain a complete listing of all the conditions associated with the various schedules.
