

Petition calls for telephone competition

Alaskans for Fair Competition last week submitted to the State Division of Elections a petition signed by more than 35,000 Alaskans, according to the organization.

The petition calls for a statewide vote on a petition to allow competition in all markets and require that all in-state long-distance carriers be regulated by the Alaska Public Utilities Commission.

Once the signatures are certified by the Division of Elections, the petition will be included as an initiative on the November 1990 statewide election ballot.
