

Alaska Power Authority publishes electricity statistics

The 11th edition of "Alaska Electric Power Statistics" has been published by the Alaska Power Authority.

The report provides summary elec-

trical information on transmission systems, installed capacity, generation and peaks for industry, the military and utilities across Alaska.

The report features calendar year

1985 data, but also includes power statistics gathered since 1960. Among the economic information included in the report is tabulation of financial and marketing data such as energy sales, number of customers and total revenues for selected utilities.

Information on selected communities includes average annual use, billing and per kilowatt hour charges.

The report is available free from the Alaska Power Authority, Box 190869, Anchorage 99519 or by calling 561-7877.
