

Mill Delay At Noorvik

NOORVIK—A very common subject heard around Noorvik has been the sawmill that arrived on the barge in September. Since that time, the villagers have been awaiting the arrival of someone to help them set up the mill.

In the meantime, many men took out FHA loans so that in the spring they will have snow-travelers and chain saws to help themselves earn a living by logging.

If the operation of the sawmill is successful, this will mean economic development in the way of better homes and employment in Noorvik.
