## GOLD MINERS

- \* On small creeks where there is insufficient water flow, partial or complete recycle systems can be added, sometimes at a very little cost.
- \* Treating waste water by using one or more setting ponds before recycling can prolong the life of your pump.
- \* The less water used for mining, the less water you have to treat.

Contact your Department of Environmental Conservation Office/338 Denali, No. 1206/Anchorage 99501/274-5527.
