

Send your money on a summer vacation.

Put your savings to work while it's away.

The new 91 Day savers certificates earn almost the same high yield as the conventional 6 month "money market certificates"...in half the time. That means if you have plans for your savings, you can make money while you wait.

Put that together with a lower minimum deposit of \$7,500.00, and you've got the most for your money.

United Bank Alaska offers the 91 Day certificates as the U.S. Treasury auction weekly rates are announced. So call UBA at 276-1911 and ask for New Accounts, to send your money on a working vacation.
