

Moose Hunting Regulations

JUNEAU — The Board of Fish and Game has adopted new moose hunting regulations which curtail antlerless hunting and provide for shorter bulls-only seasons in much of Alaska.

The action, taken at the board's spring meeting in Juneau, eliminates most August openings

and reflects generally lower moose populations in many areas.

Jim Reardon, who headed the board's moose committee, told the board that there appeared to be no single reason for the decline in the state's moose populations.

"Winter losses, predation and hunting pressure are involved but loss of habitat seems to be a key factor in many of the moose reduction situations we have seen," Reardon said.

He cited "heavy predation" as a major element which caused the board to set a 10-day, bulls-only season in unit 20A. He added that severe winters and hunting pressure also had contributed to the decline of the moose there. The area has an estimated 3,000 to 4,000 moose.

In setting the new seasons, the board tailored the regulations to the specific areas rather than eliminated antlerless seasons statewide as a bill now before the legislature would do.

"The committee's recommendations on antlerless moose were conservative and antlerless moose harvests were recommended only in those areas where there was public support," Reardon said.

LEGAL NOTICE

NOTICE: To all Stockholders of Hee Yea Lingde Corp., Grayling, Alaska.

Annual stockholders meeting to be held on May 29, 1975 in Grayling Community Hall, commencing at 10:00 a.m. For further information call 543-2682 or write: Mr. Jim Wilson, Executive Director, General Delivery, Grayling.

3 AAC 64.530. ZONE DESCRIPTIONS AND PERMIT PHRASEOLOGY. (a) The following zone descriptions will be used in the issuance of permits to motor carriers where other than specific geographic descriptions are provided:

(1) Southeastern Alaska (Zone 1): All of Alaska lying east and south of, and including, the Tongass National Forest;

(2) Western Alaska (Zones 2A and 2B): (A) North Western Alaska (Zone 2A): All of Alaska lying west of an imaginary line commencing at the mouth of the Susitna River, thence northerly to Tanana and continuing to the north coast of Alaska to Barrow and north of 64 latitude;

(B) South-Western Alaska (Zone 2B): All of Alaska lying west of an imaginary line commencing at the mouth of the Susitna River, thence northerly to Tanana and continuing to the north coast of Alaska to Barrow and south of 64 latitude;

(3) Kenai Peninsula (Zone 3): That area of Alaska lying south of an imaginary east-west line drawn through Girdwood (and including Girdwood), extending from the Turnagain Arm to Port Wells;

(4) North-Central Alaska (Zone 4): All of Alaska lying north of 64 latitude and east of the eastern boundary of Zone 2A;

(5) South-Central Alaska (Zone 5): All of Alaska lying south of 64 latitude and east of the eastern boundary of Zone 2B, but not including any area described in Zones 1 or 3;

(A) Valdez Sub-Zone (Zone 5A): That area lying west of a line commencing at a point in the mouth of the Copper River, thence northerly to Chitina and continuing north to Glenallen, thence westerly along the Glenn Highway to Eureka, thence south to approximate center of Glacier Island, and continuing southeasterly to the southern most tip of Cape Hinchinbrook, thence easterly to the mouth of the Copper River to the point of beginning.

(B) Anchorage Sub-Zone (Zone 5B): Points and places within the area bounded by the Turnagain Arm on the southwest, the Knik Arm on the northwest, the Knik River on the north, thence due south from the junction of the Knik River and Alaska Highway 3 to the boundary between Zones 3 and 5;

(6) Delete;
(7) Delete;
(8) Kodiak - Afognak (Zone 8): All of the islands of Kodiak and Afognak. The changes brought about by this regulation are outlined as follows:

Sub 1 Unchanged.
Sub 2(A) Divides Zone 2 on the east-west line of 64 latitude and names the northern part 2A.
Sub 2(B) Describes that part south of 64 latitude.

Sub 3 Unchanged.
Sub 4 Describes Zone 4 without change in boundaries (a correction).
Sub 5 A new description for Zone 5 due to the following deletion of Zones 6 and 7.

Sub 5(A) Zone remains the same; description of zone clarified.

Sub 5(B) Unchanged.
Sub 6 Deletes Zone 6 in its entirety.
Sub 7 Deletes Zone 7 in its entirety.
Sub 8 Unchanged.

Notice is also given that any person interested may on or before May 15, 1975 file written arguments or statements relevant to the action proposed hereinabove or may appear and offer oral or written arguments or other statements at a hearing to be held May 21, 1975, at the hour of 10:00 A.M., in the Alaska Transportation Commission's Hearing Room, 10th Floor MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Thereafter the Alaska Transportation Commission, upon its own motion or at the instance of any interested person, may at the hearing or thereafter adopt the above changes substantially as proposed without further notice.

DATED AT ANCHORAGE, ALASKA, this 7th day of April, 1975.

Entry Permit Info

JUNEAU — Since many fishermen did not receive their entry permits by the April 15 deadline for licensing commercial salmon net vessels and gear, the Department of Fish and Game has issued an emergency regulation which allows fishermen to license after obtaining their permit.

All fishermen who hold entry permits may license immediately. In the Yukon and Kuskokwim districts of the A-Y-K area,

licensing may be completed at any time prior to fishing.

No deadline extension has been issued for the Yukon and Kuskokwim districts because the A-Y-K fisheries are not under limitation this year.

Salmon net gear licenses must be issued by a licensing officer in the registration area in which the applicant intends to fish. This may be done by mail.

NOTICE FOR PUBLICATION
UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
Fairbanks District Office
P.O. Box 1150
Fairbanks, Alaska 99707

Hereby gives Notice that Mr. Frederick P. Meader of Wild Lake, via Bettles Field, Alaska, together with his witnesses Frederick C. Dean and Sue Dean, both of Fairbanks, Alaska has submitted application to purchase on (his/her) Homestead Settlement Claim, Serial Number(s) F-035272 for a tract of land described as:

U.S. Survey No. 4139, Alaska, located on the north shore of Wild Lake approximately 45 miles north of Bettles, Alaska.

Containing 4.83 acres.

During the period of publication or within 30 days thereafter any person, corporation, or association having or asserting any adverse interest in or claim to the tract of land or any part hereof may file in the proper Land Office, under oath, an adverse claim setting forth the nature and extent thereof, and such adverse claimant shall within 60 days after the filing of such adverse claim, begin action to quiet title in a court of competent jurisdiction in Alaska, and thereafter patent shall be issued in conformity with the final decree of the court.

LEGAL NOTICE

INVITATION FOR BIDS
STATE OF ALASKA
DEPARTMENT OF HIGHWAYS

Sealed bids in single copy for furnishing all labor, materials and equipment and performing all work on Project RS-0943(11) & RS-0943(13), Zimovia Highway and Bennet Street Intersection to Airport, and Zimovia Highway Paving described herein, will be received until 2:00 p.m. prevailing time, May 22, 1975 in the Commissioner's Office, Department of Highways, Island Center Building, Douglas, Alaska.

This project will consist of roadbed reconditioning, crushed aggregate base course, and hot asphalt paving along 0.9 mile of Bennet Street and 6.1 miles of the Zimovia Highway.

Principal items of work consist of the following: 4,100 tons of crushed aggregate base course, grading C; 10,100 tons of hot asphalt paving; 750 tons of asphalt cement AR-10; 0.9 mile of roadbed reconditioning and other miscellaneous items of work.

All work shall be completed in 195 Calendar days.

Plans and specifications may be obtained by all who have a bona fide need for them for bidding purposes from the Chief Road Design Engineer, P.O. Box 1467, Juneau, Alaska 99802 at a charge of \$10.00 (non-refundable) for each assembly. Checks or money orders should be made payable to: State of Alaska, Department of Highways. Plans may be examined at Department of Highway Offices in Anchorage, Fairbanks, Valdez.

Walter B. Parker
Commissioner of Highways

PUBLIC NOTICE STATE OF ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Applications have been received by the Department of Environmental Conservation for four waste disposal permits under sections of AS 46.03.100-.120:

Applicant: Alyeska Pipeline Service Company (agent for Amerada Hess Corporation, ARCO Pipeline Company, BP Pipelines Inc., Exxon Pipeline Company, Mobil Alaska Pipeline Company, Phillips Petroleum Company, Sohio Pipeline Company, and Union Alaska Pipeline Company, P.O. Box 4-Z, Anchorage 99509.

Proposed Activity: Either biological or physical-chemical depending on site.

Proposed Activity: Treatment and discharge of liquid waste from bathing, washing, food preparation, light industrial, and domestic waste facilities at oil pipeline and pump station construction camps.

Proposed Treatment: Either biological or physical-chemical depending on site.

Biological: extended aeration activated sludge process including bioflocculation, clarification, and disinfection.

Physical-Chemical: Physical-chemical process including flocculation, clarification, absorption, filtration, and disinfection.

Removed solids to be disposed of by incineration or other method approved by the Department.

Proposed Effluent Limitations: Effluent to be discharged to an infiltration-percolation lagoon or subsurface leaching field. The minimum required treatment shall be 85 per cent removal of biochemical oxygen demand and suspended solids from the plant influent prior to discharge to the lagoon or subsurface leaching field. Wastes discharged from the lagoon to the waters of the State shall meet the following limitations:

Parameter	Thirty Consecutive Day Average	Daily Maximum
Biochemical Oxygen Demand	30 mg/l	60 mg/l
Suspended Solids	30 mg/l	60 mg/l
Oils and Greases	8 mg/l	15 mg/l
Fecal Coliform Bacteria	200/100 ml	800/100 ml

Effluent pH range 6.0 to 9.0 standard units

1. Pump Station 6

Design Camp Size: 300 men
Peak Flow Rate: 30,000 gallons/day of physical-chemical treatment plant effluent.
Location of Discharge: Adjacent to pipeline route about 1 mile south of Yukon River in W 1/2 Sec. 19, T12N, R10W, FM.

2. Pump Station 9

Design Camp Size: 200 men
Peak Flow Rate: 25,000 gallons/day of physical-chemical treatment plant effluent.
Location of Discharge: About . mile 258 Richardson Highway and about 3 miles south of Big Delta Airport in South 1/2 of Sec. 27, T11S, R10E, FM.

3. Pump Station 12

Design Camp Size: 200 men
Peak Flow Rate: 25,000 gallons/day of biological treatment plant effluent.
Location of Discharge: About mile 65 Richardson Highway in Sec. 36, T4S, R1E, CRM.

4. Yukon Transportation Center

Design Camp Size: 56 men
Peak Flow Rate: About 3 miles south of the Yukon River bridge on the Livengood Road about mile 51 in NW 1/4 of NE 1/4 of Sec. 28, T12N, R10W, FM.

A provision of the proposed permit would allow disposal of treated liquid waste on a case-by-case basis from the infiltration-percolation lagoons to the land or surface waters of the State after submittal of an appropriate engineering plan and receipt of written permission from the Department. Any person who wants to present his views and comments, or opinion to the Department in regard to these applications for waste disposal permits may do so by writing to the Commissioner of Environmental Conservation, Pouch O, Juneau, Alaska 99811 within 30 days of publication of this notice.

A copy of the applications or proposed permits may be obtained by writing the Department at the above address.

Dated at Juneau, Alaska this 29 day of April 1975.

Ernst W. Mueller
Commissioner
Dept. of Environmental Conservation.
Pub.: May 7, & 14, 1975.
