

Calista to improve fuel services

Calista president, Nelson N. Angapak, announced last week that Calista Distributors, Inc. has formed an association with Yutana Barge Lines to supply fuel in the Yukon River and Norton Sound areas. Calista Distributors, Inc. is a centralized purchasing company of Calista Corporation. During 1984 Calista sold fuel

through CEW Distributing and Calista-Western. Both of these operations have been discontinued and all former employees of CEW and Calista-Western are no longer employed with Calista Corporation.

Through the added competition of Calista's fuel ventures in 1984,

Calista was able to bring lower fuel prices to the Yukon-Kuskokwim delta.

To further improve the quality of service and prices in 1985, Calista has consolidated all of its fuel services under one wholly owned Calista subsidiary, Calista Distributors, Inc.
