
\$500,000 for Kotzebue Water System

The Alaska Federation of Natives has been informed that the Department of Health, Education and Welfare has released \$500,000 to the City of Kotzebue for the purpose of continuing that city's water and sewage project.

The sewer and water project in Kotzebue may become a reality in the foreseeable future with the release of these funds.

Similar projects in other communities may also be pulled out of the pigeon holes where they have been gathering dust for several years due to lack of funds.

This information was released through the office of Senator Ted Stevens last week.
