ORCA opens the door to profits

ORCA workboats are built to keep your costs low and profits high. Modern manufacturing techniques and no-hills construction mean low purchase cost. Slant shipping cuts transportation bills in half. Thick hand laid fiberglass, steel bulk, rub rails and other heavy duty construction features make an ORCA nearly indestructible. ORCA safety features protect your men and your cargo with foam filled, unsinkable hulls, self-bailing decks and high gunwales.

The ORCA Cargo has a water-tight bow door. Use it at water level as a work platform or on the beach as a 500 pound loading ramp. The Cargo comes in three sizes: 25'0" Star and Star II. The ORCA cruises have a pointed bow and short towback for a cooler, dryer ride without sacrificing stability or carrying capacity. Optional decks are used for loading light cargo or trailing fish aboard. The Utility comes in 25', 27'0" and 30'0" sizes.

The ORCA Bouncer is the affordable 20'0" fishing machine for today's cost conscious fishermen. It's fast 27 mph with four cylinder 100hp. It will reach 135 mph, test of bow-hold. It's comfortable, two-hd, electric, fuel and galley. The Bouncer can be powered by the full range of Volvo Penta gas and diesel 100hp.

Alaska MARINE & EQUIPMENT

Yes... we install! Trained experts ready to go into the Field. Huge inventory of parts, call today - 276-1540 for information and prices.
