

Shungnak Spring

By FRANK CLEVELAND

Shungnak, Alaska

Well, the good old spring time again up here in Alaska. Good to have the sun up here and make the climate warm.

The caribou are up this way and good to have fresh meat. It's been a long time since the caribou gone up this way for this year.

And the bears are out of their hibernating places. Some of the people saw some and one of the Ambler people caught one; the way we hear from them.

And the other game are up here like geese, ducks, birds and so on.
