

Course offered in rotary drilling

The Mining and Petroleum Training Service, University of Alaska, announces a one credit course called Orientation To Rotary Drilling. The course is in cooperation with the Alaska Vocational Technical Center. It will be two weeks of hands-on training on an operating rotary rig

located in Seward, Alaska.

Students will learn to make up and break out connections; trip in and out of hole; make up a drill string; operate mud pumps, mud circulating systems and shale shakers; condition and circulate mud; operate BOP stack; kill a kick; renew pump valves, pistons

and liners; work derricks; operate diesel engines; and operate field mud lab.

Interested persons should contact: Jan Brooke, Mining and Petroleum Training Service, 4640 Old Seward Highway, Suite 201, Anchorage, 99503, Phone: 563-8098.
