

# Hightower joins Arctic Slope Consulting Group

Harley Hightower, an Alaskan architect with 25 years of design and construction experience, has joined Arctic Slope Consulting Group as vice president of architecture.

Prior to joining Arctic Slope, Hightower operated his own firm for 15 years and worked for firms in Anchorage, Philadelphia and Denver.

Since 1964, Hightower has been involved in projects throughout the state, primarily public works such as educational facilities, utilities and industrial buildings in Alaska's rural communities. Past projects have taken him to every community in the North Slope Borough.

Hightower has worked as a consultant for Arctic Slope Consulting Group on several North Slope projects including the Wainwright Power Plant, the Western Arctic Coal Project and a water project in Point Hope. He was also responsible for designing a \$1.5 million addition to the Barrow Fire Station and five temporary classroom buildings for Ipalook School.

Arctic Slope Consulting Group is an Alaska-based professional services firm offering specialized skills in engineering, architecture, project management, surveying, geology and geophysics.

The firm operates out of offices in Barrow, Fairbanks and Anchorage and is a wholly owned subsidiary of Arctic Slope Regional Corp.
