### **THE GENERAL MODEL TR-603G TRANSISTOR HOME RADIO**

We asked the General Corporation to design and produce a low price sensitive "Bush" home transistor radio, for the folks and families who live in the remoter areas of Alaska. They did!!!

#### **LOOK AT THESE FEATURES!!!**

1. Designed for use with a long wire outdoor antenna. No more fussing with short inefficient built-in telescoping antennas!

(2. Super sensitive six transistor (plus diode) superheterodyne circuit brings in those distant stations with ease, all the way across the broadcast band (530-1600 kc.) Stations heard as far away as Waterloo, Iowa.

3. Powerful 4" round permanent magnet speaker produces quality tone and rich volume.

4. Power output up to one watt, fills your home with entertainment.

5. Operates from four standard large "D" size flashlight cells. You can forget about the need to connect your radio to 110 volt powerline or generator.

6. Ultra modern styling matches any decor...house, cabin, or tent.

7. Small size fits in anywhere. Approximately 4"D x 5"H x 10 1/2"L

8. Light weight....less than 3 pounds!

9. Available in two colors....red or blue.

(YOUR CASH PRICE, prepaid to any Alaskan Post-office....\$15.95, plus insurance fees, on orders accompanied by money order or cash.) One third deposit on COD orders. No personal checks, please! EXTRA set of four superior quality LAMINA "Gold Seal" size "D" batteries....\$1.00 Box of 24 "D" batteries, parcel post prepaid....\$5.40.
