

Researches Soybean Flours and Protein Concentrates

Mrs. Richard H. Kalbrener, daughter of Mrs. Irene Bailey of Las Vegas, Nevada, and a chemist at the U.S. Department of Agriculture's Northern Regional Research Laboratory, Peoria, Ill., is presenting a paper at the annual meeting of the American Association of Cereal Chemists in Minneapolis, Minn., October 18-22, 1970.

Mrs. Kalbrener, who gave her paper on Wednesday, October 21, described the sensory evaluation of commercial soy flours and of protein concentrates and isolates.

Soy flour and derived products have excellent nutritional qualities for food applications and are already used in many food products.

The flavor evaluation conducted by Mrs. Kalbrener and

her coworkers will contribute to increased use of these three forms of processed soybeans.

Her work is part of the research being conducted at the Northern Laboratory on domestic oilseed crops.

Mrs. Kalbrener, the former Judith Bailey, graduated from Rancho High School in Las Vegas and joined the staff of the Northern Laboratory after receiving an A.B. degree in 1967 from Winona State College, Winona, Minn.

Her husband, Richard H. Kalbrener, was a 1968 graduate of Winona State. His parents, Mr. and Mrs. H.R. Kalbrener, reside at 527 Hiawatha Blvd., Winona.

Mrs. Kalbrener's sister, Ann Bailey, is a student at the University of Alaska.
