

Seminar June 22 targets mariculture

Some of the world's leading fish farming experts will discuss innovations in land and sea farming technology June 22 in Juneau.

Rodger Painter, executive director of the Alaska Mariculture Association, said the seminar presents Alaskans interested in fish farming a unique opportunity to discover the latest technological advancements and to meet directly with representatives of 18 Norwegian companies.

"This is a wonderful opportunity for Alaska's fledgling fish farming industry to gain broader knowledge of innovations in land and sea farming technology," Painter said. "The seminars include presentations on sea-based and land-based farming, feed technology, fish handling, packaging, transportation and the latest developments in Norway."

The Norwegian Fish Farming Infrastructure Seminar is sponsored by the Trade Commisison of Norway. The cost is \$120, which includes seminar materials, lunch and a reception.
