

NASEA postpones science meeting

Gary Allen, executive director of the Native American Science Education Association, recently announced postponement of the *Bridges* conference scheduled for Oct. 22-24 in Anchorage.

Allen said the decision to postpone the conference was due primarily to the poor economic conditions in Alaska which have affected school district budgets.

NASEA's conference has been rescheduled to Feb. 4-6 and will be held in conjunction with the Alaska Bilingual-Multicultural Education Conference, Feb. 3-5.
