

Figure 1. The effect of the number of clusters on the classification accuracy of the proposed model.

# The Fourteen Tundra Times August 30, 1978

This image consists of a dense, abstract pattern of dark gray and black speckles on a light gray background. The speckles vary in size and density, creating a textured, noise-like appearance. There is no discernible text or other content.

This image shows a dark, irregular shape, possibly a piece of debris or a hole, against a light gray background. The shape is roughly triangular in orientation.
