

Trimester Proposed At Edgcumbe

(From—The Channel Light,
Mt. Edgcumbe High School)

"If a trimester program is approved for this school, we can enlarge student enrollment to 900. A program to operate this school on a year round basis is under study. This would involve enlarging the course of study and the staff," said Superintendent Crites.

Trimester sessions would mean school all year with each trimester equivalent to the present semester. . . . A student wanting to accelerate could go to school all year long and finish high school in two and two thirds calendar years.

In the trimester plan, the student body would be divided into three groups of approximately 300 students each. Two groups would be here, the other on vacation.

Staff members are discussing the pros and cons of this new plan.
