

Dress warm! Barrow set record low temperature of -48 Jan. 27. Other chill factors in the south and northwest hit -82. The chart below explains how a chill factor is calculated:

WIND-CHILL FACTORS

Wind speed (mph)	Thermometer reading (degrees Fahrenheit)											
	35	30	25	20	15	10	5	0	-5	-10	-15	-20
5	33	27	21	19	12	7	0	-5	-10	-15	-21	-26
10	22	16	10	3	-3	-9	-15	-22	-27	-34	-40	-46
15	16	9	2	-5	-11	-18	-25	-31	-38	-45	-51	-58
20	12	4	-3	-10	-17	-24	-31	-39	-46	-53	-60	-67
25	8	1	-7	-15	-22	-29	-36	-44	-51	-59	-66	-74

Note: This chart gives temperature equivalent for combinations of wind speed and temperature.
