QUARANTINE

In 1925 the lives of everyone in Nome depended on the courageous actions of 20 dogmusers and their teams. Without the serum delivered against enormous odds by this sled dog relay, diphtheria could have ravaged Nome and left many people dead.

Today there are safe and effective vaccines that protect against many of the diseases which earlier generations lived in fear of. Now we must fear complacency.

Children should complete their basic immunizations by age two, *but nearly 40% of Alaskan children do not!* IS YOUR CHILD UNPROTECTED AGAINST KILLER DISEASES LIKE DIPHTHERIA, POLIO, AND WHOOPING COUGH? WHAT ABOUT TETANUS, HARD MEASLES, GERMAN MEASLES, AND MUMPS?

Fifty-six years ago no one in Nome would have ignored an opportunity to be immunized. DON'T IGNORE YOUR OPPORTUNITY — OR YOUR CHILD'S. Information about immunizations is available wherever you receive medical care. Or write:
