

Think About It...

"Rural policy makers and program managers like me should adopt a new litmus test for everything we do: Whatever encourages local action and vitality should be promoted and whatever bogs it down should be stopped."

**David Hoffman, Community Organizer
Nome, Alaska**

"We are taught not to kill any animals we don't need. Rabbit fried with moose fat is really good to eat at any time. But we are not to kill rabbits in the spring time as it is carrying little ones at that time and killing one may be killing six or seven."

**Titus Peter
Council/TCC
Birch Creek**
