

McLee/DNH in Joint Venture

ANCHORAGE — McLee/DNH of Fairbanks, a joint venture of McLee Construction Company and DNH Development Corporation, is the successful bidder on a contract to provide maintenance services for trans-Alaska pipeline facilities in the greater Fairbanks area.

The contract, estimated at about \$5 million, was awarded by Alyeska Pipeline Service Company, the firm responsible for the design, construction and operation of the pipeline.

McLee/DNH will provide general maintenance and on-going renovation services for Alyeska leased facilities in Fairbanks and on the North Post of Ft. Wainwright.

McLee/DNH and another Fairbanks joint venture operator, Circle-Fair Construction, performed the phase I renovation work on the leased Army facilities.

Seven contractors bid on the maintenance contract.
