

**WILLOW GATHERERS**—An Anaktuvuk Pass woman and daughter are busy gathering willows for winter fuel. The willows have to be transported to the village more than 5 miles away. Soon the Anaktuvuk Pass residents may obtain a new source of fuel—coal. There are coal deposits about 10 to 15 miles from the village and through VISTA volunteer Dennis Schmitt, a tractor is being obtained through the Bureau of Indian Affairs. With the tractor the volunteer and villagers plan to mine coal for fuel.—Photo by Dennis Schmitt
